Mr Orange,

Hello, my name is François Decarie, I am the Computer Vision Engineer on this project and I work for Dr Grant.

I understand that you have some questions about the software for the invention for the patent application ?

May I give you a call? My phone number is 613-851-6402

Thank you for your time

François Decarie, CD, B.Sc, M.Sc

That would be perfect, are you available now or if not what time would suit?

John

Pleasure to speak with you today and thanks for your assistance. I look forward to getting the "flow charts" and architecture. If it is possible to get these tomorrow it would be ideal. I have family commitments over the weekend so as they say, time is of the essence.

Best regards
